Conformance classes BSI provides the following C4 conformance classes: BSI-1 – for programs conforming to the published, stable version of the language BSI-2 – for programs conforming to the published, recent versions of the language BSI-3 – for programs conforming to the language as specified in the BSI Language Specification BSI-4 – for programs conforming to the language as specified in the BSI Language Specification See also Eiffel UML References External links International Organization for Standardization Agreement on the use of ISO/IEC 18032-2 (BCM12001-9) Category:ISO standards Category:Systems engineering Category:Computer-related introductions in 2005 Category:ISO 9000 series Category:IT infrastructureWednesday, July 11, 2007 Murdoch Shrieks Over the past week I have been listening to the radio almost every day. I would say probably an hour a day. The last three days, it's been almost all talk radio, Fox News, etc. I was listening to the radio yesterday, and I heard an interview with Paul Krugman, some Nobel Prize Economist. I am no economist, but I know that he has won the Nobel Prize for economics, and I have read some of his books. At any rate, he was talking about how a change in trading patterns would affect the employment numbers. He claimed that the trading patterns change because of the following: 1. A lot of jobs are automated. 2. People are not changing their habits so much that they are falling off the unemployment rolls. 3. The wage freeze continues. 4. It takes time for new technology to change the way that things are done. He made the point that we are already starting to see a change in employment due to some of the above. I'll take his word for it. The comment that most bothered me, was that he claimed that there was a wage freeze because of a fear of inflation. My question to him was, "If you are claiming that because of the wage freeze we are not having wage inflation, why does it not matter that we are going through deflation? We have had a deflation for a good amount of time now. There are a lot of indicators that the economy is going to go through the next two years with deflation." Now
