high quality, home) the seller told me an audio driver is missing. I tried to install the drivers, but they installed something different, so I bought an acer aspire one XFA4258, 1GB ram, 160GB hard drive. Maybe this is the problem. The seller told me it works, but I still don't hear sounds. In this laptop I have a creative audiobox Z3 audiobox plug in audio. You have suggested I try to install the audio driver, but I don't know how to do it, and I can't find on the internet any information about it. Could you help me a little bit? I really like this laptop, but I have problems with it. I don't
