Many users have become aware of the many benefits of using good-quality software to resize images for them. When you resize images using the latest software, you don't need to worry about them being so small that people won't be able to read them, nor be to large that it could become a huge problem. With the advent of today's digital cameras, it is necessary to have all of your images resized to fit the print or screen you are using. The Bulk Image Resizer is an easy to use tool that will resize your images automatically, so it is perfect for having all of your images resized on the same day. Bulk Image Resizer gives you the ability to create and edit bulk resize jobs, so it is very convenient to have all of your images resized and saved at the same time. You won't need to have to manually resize each and every image, as Bulk Image Resizer does it for you, saving time and making life a lot easier. You can either choose from a large number of preset sizes that have been developed, or you can use the specific size you require. Bulk Image Resizer enables you to keep and maintain a list of folders and pictures, making it possible to create and resize images within those folders. You are given the option to use image masking if you want to, so you can easily change the colors of the image, or you can change the color of the background, and also the text if you want to. When you resize an image in Bulk Image Resizer, it has the ability to resize the entire image, so you don't have to worry about losing quality. You have the option to either resize the images in batches or resize them individually. While in batches mode, you can choose from a large number of preset sizes, or you can use the specific size you require. If you decide to resize your images individually, then you need to set the required options, such as the dpi settings, image width, height, and the approximate time to complete the resize. You can also select the file format, as well as the size and quality of the output file. When you have finished selecting the options and have pressed Resize, then you will be able to see the progress bar for the individual images. The process of resizing the images will be much quicker, particularly for images that have been saved in a lot of folders. As well, the more you resize images, the faster the
