. . 5.34-Maxikoscos Business Manager Office Softmaker v2010.572-ML (Spanish).. .Q: CSS / HTML - Div within Div I'm trying to have a div (with class row) with two child divs (with class col1 & col2) within it. What am I doing wrong here? .row{ height:50px; width:150px; border:1px solid; } .col1{ float:left; height:30px; width:60px; border:1px solid; background-color:#f00; } .col2{ float:left; height:30px; width:60px; border:1px solid; background-color:#0f0; }
A: The issue is that your col1 and col2 are floating left but you also have them set to widths of 60px. When they float to the left, they take up space on the right, which then prevents the adjacent element (row) from taking up space. You could solve this by either using display:inline-block on the columns or removing the width from col1 and col2. .row{ height:50px; width:150px; border:1px solid; } .col1,.col2{ display:inline-block; } .col1{ height:30px; background-color:#f00; } .col2{ height:30px; background-color:#0f0; } 4bc0debe42
