? Copyright ? COPC DLL ? Version ? File Size ? License ? Debug You will find this very good. It's based on COM, called the component object model. Without the user's help, this program will open a window displaying a few system-related messages. The actual code within the [code] area is not in the module. , COM components and produces dynamic reports. It adds 1K or less of code to your program and ships in a single exe, so you don't have to deal with installation. You can then embed the OPC component into your program, receive messages from the OPC server, and display those messages in your application. It includes a multi-threaded, server implementation for receiving and displaying messages from OPC servers or devices, a multi-threaded, ASN.1 serialization library, a tree-control component for creating data-grid and/or tree-view pages, and a number of excellent and easy-to-use reporting capabilities. Overview : This program is a COM component for the Ole DB Server. The Ole DB Server is a fully generic data access server. It allows you to store your Ole DB data in the database. This component is used in your.NET applications for storing data in the database and retrieving the data from the database. Components required : - OleDB DLL. - COM Component Development Studio (VCL) Designed and developed by BioDecision Systems (Pty) Ltd. Software components of the medical product must be strictly controlled by national law and strict regulations of the health service and product safety. Each component must be analyzed, simulated and confirmed by legal and quality-control personnel before shipment. STATIC-FREE FEATURES 1. Large data storage capacity for operation (the maximum storage of data is determined by size of the COM servers and the copy of the COM servers). 2.
