Photoshop CS3 is the current mainstream version of Photoshop, for use with computer hardware and on the Mac or Windows OS platforms. Versions After CS3 Beginning January 1, 2014 Adobe Photoshop CC will be offered as a subscription service. The feature set and intended audience of Photoshop is expected to change under the new subscription model. Adobe Photoshop Lightroom is a similar product to Photoshop with its own tagging system, can import and export photos from Photoshop and can be used on both Mac and PC. Its focus is on metadata collection and organization, rather than raw image development and manipulation. Adobe Photoshop Elements, once a separate product, is designed for novice users who simply want to import photos or move them from another program to Photoshop. It does not offer layer manipulation or sophisticated editing features. Adobe Photoshop Lightroom is free for Mac users and has a price of \$49.99 for Windows. Photoshop Elements is free for both Mac and Windows users. Adobe Photoshop vs. Other Programs Photoshop is among the leading products in image editing. It features a powerful set of editing tools, and a large library of plug-ins that enable both beginners and professionals to add specific features or tweak a photo. Other software programs, such as Adobe Photoshop Elements, offer the same basic features as Photoshop and other applications. However, Photoshop Elements and similar products do not provide layer-based editing, making it difficult to apply multiple edits at one time on a composite image. Instead, Photoshop Elements and other competitors use flattened layers—blank canvases on which to apply edits. While many images can be successfully re-created with Photoshop Elements, it is not the best image editing program for the beginner. Part of the reason Photoshop remains a popular choice is its wide array of advanced functions. TORONTO - A woman who was involved in a relationship with the man charged with first-degree murder in the shooting deaths of three men outside a strip club in Toronto has made an emotional court appearance. Valentino "Vennz" Sainz's ex-girlfriend Tanisha Lara said he didn't mean to shoot the three men. "He was trying to call the police," she said, as she wept in court in Toronto on Wednesday. "There was a lot of things he was upset about." At the time of the shooting, Lara says she was with Sainz at Sainz's mother's house and did not want to get involved. "I just said, 'I can't be involved,'" she said in Spanish. "I'm not his girlfriend." Sainz, 33, allegedly gunned down three men outside a strip club in the Beaches neighbourhood on May 5. His ex-girlfriend says that even though she and the victims knew Sainz, she still has to cope with the murders. "I've been doing this for 22 years," she said. "It is hard. It's almost impossible." Lara says she is still angry at Sainz, whom she says she wanted to separate from. She said she's also still frustrated with the police, who have not contacted her for months. "I need somebody to listen, not just to the police," she said. Lara's lawyer Robert Mahoney told reporters that she has suffered great mental anguish. "I'm very, very, very, very sad and very upset and very angry," she said through tears. Sainz is facing three counts of first-degree murder and three counts of attempted murder in connection with the killings. Lara says she's concerned that she will be a suspect, because "he wanted to get me out of the way." Lara also broke down in tears when asked whether Sainz's mother might try to protect him. "That's an absolutely ridiculous question," she said. Lara says Sainz's mother was concerned for her when the shooting happened and Sainz stayed at his mother's house until police arrived. "She said to me, 'You stay here. If you don't see the police, stay here for the cops,'" she said. Lara says Sainz
