In the 1980s, however, the EC recognised the need to reduce the area of conflict and started looking at other ways to tackle the issue. The EU's Conventional Armed Forces in Europe Treaty, TABD, was the first successful attempt at one. Now, the EU's most ambitious and complex military operation is the military component of the Asia-Pacific Stability Initiative (APSI) and the formal adoption of the APSI legal framework by the EU Council would establish a formal EU military mission in the Asia-Pacific region. This briefing examines the history, purpose and legal status of the Treaties-avoiding Treaty (aka the APSI Treaty) and also considers in detail the substantive legal issues involved in the formation of the EU defence mission and the political environment it will operate in.Wisconsin Manufacturing Summit "

Arsene Wenger has insisted Alex Song will be at Arsenal next season, despite City being linked with a move. City are understood to be interested in re-signing Song, who is out of contract, but are thought to be low down the list of potential replacements for Gareth Barry. Manchester United have also been touted to be a potential destination, but the Frenchman has dismissed those rumours. "It's not that I am very confident or very sure Alex Song will stay, but I'm optimistic about that," said Wenger. "I'm not sure if you like it, but I try to be as positive as possible." City boss Roberto Mancini's decision on whether to keep Barry beyond the transfer window has been the subject of much speculation. The 31-year-old is thought to be keen to remain in the Barclays Premier League but sources close to the player have said he may not stay if funds are limited. Wenger said Arsenal expect to benefit from Barry's departure. "We are not planning to do anything on it because we are in the same situation," he said. "We have a squad of 27 and one of them will have to go. In the end, it is not going to be Arsenal who will go. "So we are in the same situation as City, so my job is to get as good players as possible."1. The measurement of frequency is sometimes referred to as frequency spectrum analysis. In frequency spectrum analysis, the alternating frequency of a signal is measured and compared to a reference frequency. The instrument can indicate to the user the overall strength or amplitude of the signal as well as the frequency of the signal. In addition, some conventional multimeters have circuits incorporated therein, which enable the user to measure the frequency spectrum of an alternating signal. For example, the meter may
